Keywords: (in italics, alfabetic) 3-5 words

(Center, cambria 10, 1 spacing, italics)

INTRODUCTION [Cambria 11, bold]

This section covers the background of the issues or problems and the urgency and the rationale of the study. The purpose of the study and the plan to solve the problems are stated in this section. Relevant literature reviews and hypotheses development (if any) are stated in this section. This part is closed by state of the art (the specification of the purpose of the study and the difference with the other studies) [Cambria, 11, 1.15 spacing]. Maximum 15% of the entire article.

METHODOLOGY [Cambria 11, bold]

This part covers the study approach, the object of the study, scope, the data collection instruments, place, the data collection technique, and the analysis technique. [Cambria, 11, 1.15 spacing]. Maximum 10% of the entire article.

RESULT AND DISCUSSION [Cambria 11, bold]

This section presents the result of the study, discussion, and the finding. The result of the study provides the data of the study. The discussion section analyzes, compares, contrasts the data with the relevant result of the other studies. The finding section serves novelty in the form of generalization, concept, theory, formulation, principle, and postulate. The discussion result and findings of the study need to be strengthened by an illustration in the form of table or figure (graphic, diagram, chart, photo, example). [Cambria, 11, 1.15 spacing].. The portion of the result and discussion section is at least 70% of the entire article.
